

Develop you skills and get your career back on track!

Social Hackers Academy's knowledge of the tech industry in uncanny.
Participate in our courses and build skills and habits that will differentiate you from others!

UpSkilling – ReSkilling

You want to develop your career and you're not sure what classes to take?

SHA has feedback from 100s of HR managers on the skills required for the tech industry. Either you want to change the stack you work with or just learn for the sake of it, we offer the courses which are right for you.

Continuous Skill Development

Social Hackers Academy provides you access to courses to develop your soft & hard skills for you to stay relevant to tech industry's needs and continuous development.

Nano-learning Paths

Divoting time for acquiring new skills and changing habits is tough. We've all been there.

We are offering you learning experiences where you only devote 1-5 minutes per day and at the end you've learned new skills or changed habits that didn't serve your professional growth.

Get access to our talent pool

We've created a Hiring Platform where 100s of HR managers are waiting to recruit you

Getting a job or wanting to get a better salary or position? We have created a platform that will get you hired!

I was a university student before I came to Athens. But I couldn't finish my education due to the conditions in Syria. I have been living in Athens for almost one and a half year. When I enrolled in this course, I didn't have any background in software engineering but thanks to our mentors we learning step by step and it starts to seem possible to become a developer. Therefore, it is very important to me.
